

Belgravia NetZero Energy House

Figure 1. Computer drawing of the front of the house

Note that these are early concepts of the house, which showed a 2-collector active solar thermal domestic water heating system. This system is now not included on the house because the prices of solar electricity have dropped so much.

Figure 2. Computer drawing of the south side of the house – with the awning in the summer position

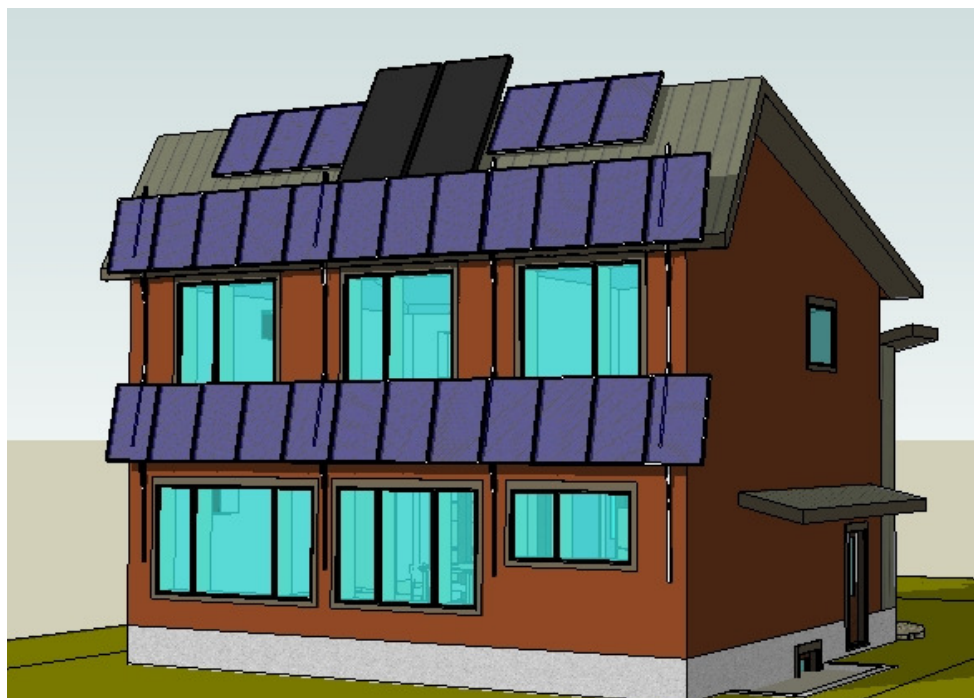

Figure 3. Computer drawing of the south side of the house – with the awning in the winter position
